

Design-Build Project Highlights

Project: Amphitheatre
Location: Finger Lakes - NY
Type: Hybrid
Features: This unique structure incorporates a Pre-engineered type tapered three plate column, curved open web trusses, bar joist, and Metal Deck with architectural standing seam roof. Each Frame is different because the foundations step up and the frames get wider at each column line as you work back from the performance stage. - An exciting but rewarding project and a great engineering and detailing challenge met by the Covenant Team.

DESIGN, QUALITY, SCHEDULE... DELIVERED.
